EXPERIENCE

Netopia

Flutter Mobile Engineer 10/2025 - Present Hybrid

- Developed the “Passeport Maroc” government mobile application for the digitalization of passport requests and tracking.
- Integrated secure government APIs and the official DGSN SDK for Moroccan identity document scanning, validation, and protected data extraction.
- Integrated secure payment workflows through payment gateway redirection, backend transaction verification, and automated continuation of application processes upon successful payment.
- Implemented advanced mobile security protections including SSL Pinning, encryption, root/emulator detection, anti-debugging, and secure network configuration.
- Worked directly with the Ministry of Interior security team to remediate vulnerabilities identified during official APK security audits.
- Collaborated with DGSN, Dar As-Sikkah, and backend teams to ensure compliance, reliability, and secure production delivery.

Intelcia IT Solutions

Flutter Developer Freelance 11/2024 - 06/2025 Hybrid

Government Digitalization Projects

- Developed and maintained multiple government mobile applications including E-Parapheur, Rendez-vous, Chikaya, and Bureau d'Ordre.
- Integrated secure REST APIs and managed complex application data flows in regulated environments.
- Designed accessible and user-friendly mobile interfaces adapted for large-scale public usage.
- Collaborated with cross-functional teams including backend, QA, and business stakeholders to ensure application reliability and compliance.
- Contributed to production-ready Flutter architectures with focus on stability, maintainability, and performance.

ELITECONNECT

Flutter Developer Freelance 09/2023 - 11/2024 Remote

- Designed and developed EliteConnect, a sports recruitment mobile platform connecting clubs, coaches, agents, and players.
- Built dynamic user profile systems and interactive platform features using Flutter.
- Integrated scalable application flows and optimized user experience across mobile interfaces.
- Collaborated on product evolution and feature delivery in an agile remote environment.

WEBCK

Flutter Developer 06/2024 - 09/2024 TechnoPark

- Developed Flutter mobile features for an enterprise management application using REST API integration.
- Applied Flutter best practices including state management, responsive layouts, and clean navigation architecture.
- Participated in testing and debugging activities to improve application stability and user experience.
- Contributed to feature implementation and application performance optimization.

FREELANCER

Développeur Flutter 12/2022 - 09/2023 Remote

- Developed Flutter mobile applications with REST API integration and Firebase services.
- Implemented state management solutions using GetX, Provider, and Riverpod.
- Published mobile applications to Google Play and maintained production releases.
- Improved application performance and implemented geolocation features using Google Maps API.

PROFIL

Flutter Developer specialized in secure and high-performance mobile applications for government and regulated environments. Experienced in secure API integration, mobile hardening, SSL Pinning, runtime protection, and production deployment. Contributed to large-scale digitalization projects in collaboration with public institutions and cross-functional technical teams.
